Task 4: Sprint Backlog

Sprint Backlog:

User Stories for Languages

1. **As a shopper, I want to view product descriptions in Japanese so that I can understand product details in my native language.**
2. **As an admin, I want to manage and update Italian translations for all site pages so that content remains consistent and accurate.**
3. **As a content manager, I want to review and approve German translations of product listings so that our international audience receives reliable information.**
4. **As a buyer, I want the checkout process to be available in Portuguese so that I can complete purchases without language barriers.**
5. **As a developer, I want to integrate an automated translation tool for Chinese to reduce manual translation efforts and speed up site localization.**
6. **As a quality assurance tester, I want to verify that Korean translations display correctly across all user interfaces so that our users experience seamless navigation.**

User Stories for Currencies

1. **As a shopper, I want to view prices in South Korean Won so that I can easily understand the cost in my local currency.**
2. **As an admin, I want to configure the currency settings for the Indian Rupee so that the site accurately reflects local pricing.**
3. **As a product manager, I want to display product prices in Brazilian Real so that I can effectively target the Brazilian market.**
4. **As a buyer, I want the payment system to support Mexican Peso so that I can complete my transactions smoothly.**
5. **As a financial analyst, I want to monitor currency conversion for South African Rand to ensure pricing strategies remain competitive and accurate.**
6. **As a developer, I want to implement support for the Russian Ruble so that our site can correctly display localized pricing for Russian customers.**
